

TECHNICAL DATASHEET

Mortar Mix

Description & Uses

Cromar AlphaChem Mortar Mix is a 2-component mixture, containing 2-parts Ordinary Portland cement and 1-part moist fine red building sand. Which when mixed together they create the perfect mix for brick laying, pointing, patching, rendering and general repairs. Excellent workability without the need for additional additives.

Part of the AlphaChem Small Bag range of products – ideal for small jobs, meaning less wastage. The plastic sealed bags also mean the product is kept fresher for longer.

Application

- Thoroughly mix contents of bag together (cement and sand) on a board or in a bucket using a trowel, once you have a thorough mix add water and mix until you have your desired consistency, which should be smooth, for the job you are doing.
- Be careful not to get your mix too wet! It should be wet enough to slip off the shovel but holds its shape if you make a hollow in the mix.
- To colour mortar, add dye before mixing the mortar.
- It is the user's responsibility to dispose of all packaging correctly.

Storage

Store indoors in cool, dry conditions between +5 and +25°C. Protect from rain and frost.

Shelf Life

12 months if stored as directed in original, sealed packaging.

Limitations

- Do not use during freezing conditions.
- Do not use in extreme heat (above 30 degrees).

- In dry condition wet background and cover finished work with damp sacking or polythene. Premature drying can result in lack of strength or crumbling. Once the mix starts to set, it cannot be re-mixed because it will reduce the mortar's strength.
- It is the user's responsibility to ensure suitability for use.
- Read the label prior to use it contains essential health and safety information, further information can be found on the Safety Data Sheet available on request.
