

A SIKA COMPANY

Our latest innovation, the Vent3 Air® breather membrane, addresses the needs of specifiers, distributors, and contractors comprehensively. Boasting exceptional air permeability, vapour resistance, and waterproofing properties, this membrane is set to join the revolution the market needs for both product quality and performance.

## Key Benefits

Available in 1m width rolls

UV and water resistant

Exceeds BS EN 12114 and conforms to NHBC guidance for air permeable breather membranes

No vapour control layer needed for non-ventilated pitched roof constructions

Reduces the need for mechanical ventilation.

For use under tiles and slates as a pitched roof underlay

Compliant for use in zones 1-4 on a 345mm battened lap  
- without the need for taping
